SKILLS React, Redux, Javascript, Ruby, Rails, SQL, PostgreSQL, HTML5, CSS3, MongoDB, Mongoose, Express, Node, AJAX, jQuery, Python

PROJECTS

Recipistic | (*React, Redux, Javascript, Rails 5, Ruby*)

[live](#) | [github](#)

A full-stack application clone of Epicurious, a food blogging website.

- Utilized JBuilders to formulate JSON objects in my Ruby on Rails backend views to send information towards the ReactJS frontend.
- Implemented a search algorithm based on string query to search for specific recipe titles.
- Assembled custom modals using React to allow forms to render

Pantry Chef | (*MongoDB, Express, React, NodeJS*)

[live](#) | [github](#)

A recipe suggestion app based on ingredients given.

- Established custom backend routes using Express and MongoDB to bring referenced data to frontend.
- Developed a custom side menu component to render user information from any page.

Build-A-Burger | (*Javascript, HTML, CSS*)

[live](#) | [github](#)

An interactive game where your objective is to cook and send out as many burgers as you can in a time limit.

- Constructed graphics using Canvas, HTML5, and CSS to give users an unique interactive game.
- Engineered custom algorithm to allow for any combination of patty positions on grill with any bun position.

EXPERIENCE

Line Cook

Big Chef Tom's Belly Burgers

Mar 2018 - Nov 2018

- United with other line cooks to efficiently and effectively send out 100+ burgers daily.
- Increased quality and rate of product delivery by directing team members on orders placed during a rush.

Sales Clerk

Alcatraz Enterprises

Mar 2019 - Feb 2020

- Organized and trained new hires to work other positions in the store.
- Negotiated transactions totalling upwards of \$10,000 daily.
- Leveraged Excel to organize shipments of incoming inventory.

EDUCATION

City College of San Francisco - *Credits Towards an AS in Computer Science*

AppAcademy - 16 week immersive full-stack development bootcamp
