

JIMMY KUANG

San Francisco, California jimmy.kuang96@gmail.com [Portfolio](#) [LinkedIn](#) [Github](#)

SKILLS React, Redux, Javascript, Ruby, Ruby on Rails, SQL, PostgreSQL, HTML5, CSS3, MongoDB, Mongoose, Express, Node.js, AJAX, jQuery, AWS, Webpack, Git, Heroku

PROJECTS

Recipistic | (*React, Redux, Javascript, Rails 5, Ruby*)

[live](#) | [github](#)

A full-stack application clone of Epicurious, a food blogging website.

- Utilized JBuilders to formulate JSON objects in Ruby on Rails backend views and to send information towards the React frontend to streamline data rendering
- Implemented search algorithm based on string query to search for specific recipe titles
- Assembled custom modals using React to allow forms to render for seamless user experience

Pantry Chef | (*MongoDB, Express, React, NodeJS*)

[live](#) | [github](#)

A recipe suggestion app based on ingredients given.

- Established custom backend routes using Express and MongoDB to bring referenced data to frontend
- Developed a custom side menu component to render user information from any page
- Employed Flexbox, HTML, and CSS to style frontend components and make an eye catching website

Build-A-Burger | (*Javascript, HTML, CSS*)

[live](#) | [github](#)

An interactive game where your objective is to cook and send out as many burgers as you can in a time limit.

- Constructed graphics using Canvas, HTML5, and CSS to give users a unique interactive game.
- Engineered an algorithm to allow for any combination of patty positions on grill with any bun position
- Designed conditional cases and events to let users click and drag elements of the game

EXPERIENCE

Sales Clerk

Alcatraz Enterprises

Mar 2019 - Feb 2020

- Organized and trained 5+ new hires to work other positions in the store resulting in new hires working efficiently and independently
- Negotiated transactions totalling upwards of \$10,000 daily while maintaining customer relations
- Leveraged Excel to ensure optimization and organization of shipments and incoming inventory daily

Line Cook

Big Chef Tom's Belly Burgers

Mar 2018 - Nov 2018

- United and collaborated with other line cooks to efficiently and effectively send out 100+ burgers daily
- Streamlined quality and rate of product delivery working in a fast paced and high stress environment

EDUCATION

AppAcademy

Jul 2021 - Oct 2021

16 week Immersive 1000+ hour Full-Stack Software Development Bootcamp focusing on Pair Programming, Ruby, Ruby on Rails, JavaScript, and more

City College of San Francisco

Aug 2019 - Jun 2021

Credits Towards an AS in Computer Science
